
Acer Iconia 6120 Virtual Keyboard Software 11

The bottom touch screen doesn't work at all unless I use it as a virtual keyboard. If I send apps/programs to it, I cannot interact with ... I've been searching around for hours and I can't find an answer, anyone. I've already uninstalled from my hard drive and reinstalled, but it doesn't show. All the programs I run, it works fine and I can use them even with the touch screen. (I checked it just now.) But I can't interact with it as a keyboard. If I send apps/programs to it, I can't interact with it using the touch screen.
